

BRL – Flying Arena

BRL facilities include two Flying Arenas. The Large Flying Arena covers an area of 182 sqm and the Small an area of 106 sqm. The Large Flying Arena is equipped with an Infrared Motion Tracking System and an overhead camera.

Key Features

- VICON motion tracking system
- Cameras
- Soft bed
- Curtains and safety measures

Possible Applications

- Drone Development
- Formation Flying of Drones
- Drone Flight Control
- Drone Platform for Sensors
- Drone position calibration

Access information

Corresponding infrastructure	University of the West of England Bristol Robotics Laboratory
Location	Coldharbour Ln, Stoke Gifford, Bristol BS16 1QY, UK
Unit of access	Working day

Technical specifications

No technical specifications specified.
